

Replace the Apple Mouse battery

Written By: Lasse.gra

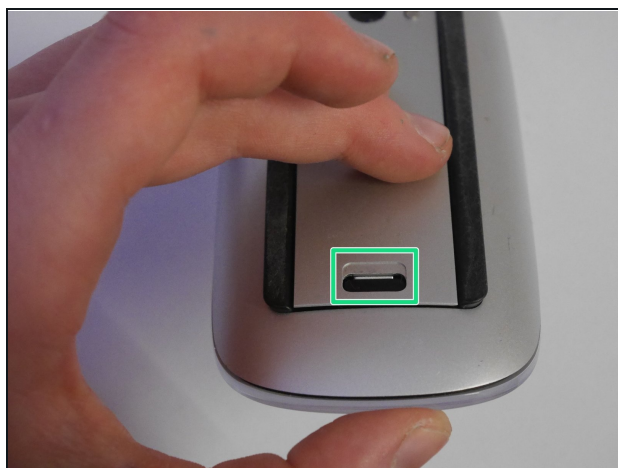

Step 1 — I turned off the mouse

- Turn off the mouse before you begin.

Step 2 — Open mouse

- Press the black clip down.

Step 3 — Remove the fin

- Move a selection on the gap between the box and the fin.
- Remove the flap from the housing.

Step 4 — Remove the batteries

- Place a selection between the battery and the interior ramen of the mouse.
- Make the battery lever from the battery compartment.

⚠ The levers should not be strong, otherwise the battery or mouse can break.

Step 5

- Make it lever to the other battery with the same technique of the battery compartment.

Step 6 — Finished

- Time mouse is without battery.

Repeat the steps in reverse order to reassemble the device.
