INTRODUCTION

A guide on how to replace the optical disk drive on a Toshiba Satellite C55-B5200 laptop.
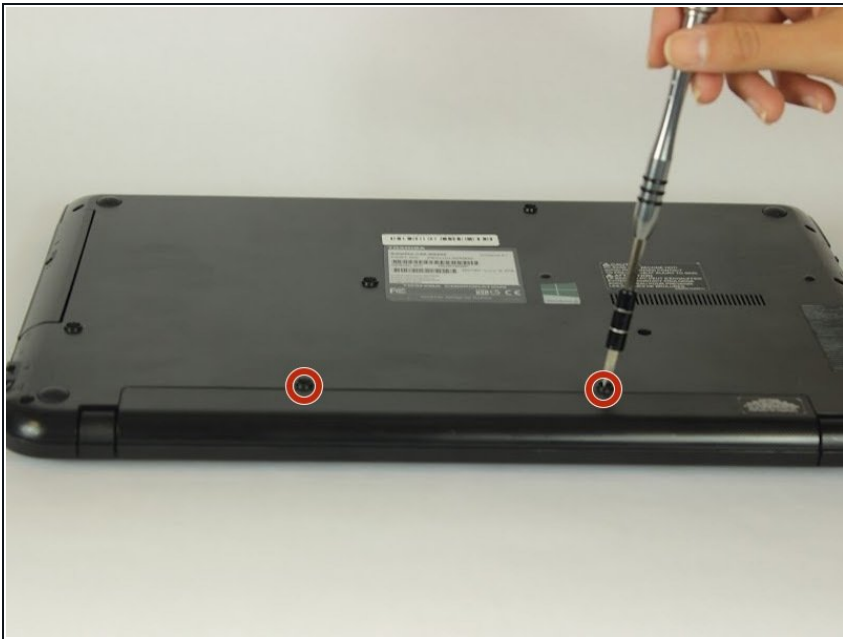

⚙ TOOLS:

Phillips #0 Screwdriver (1)
iFixit Opening Tool (1)

Step 1 — Battery

- Turn the laptop off and remove all sources of power.

- Flip the laptop over so that way the bottom is facing towards you.

- Remove the two 6.6mm Phillips #0 screws from the battery.

Step 2

- Pull the battery out of the laptop.

Step 3 — Optical Disk Drive

- Make sure device is turned off and unplugged

⚠ Failure to do so could result in electric shock

- Use J0 Philips Head Screwdrivers to remove 13, 6.6 mm screws on back of device

Step 4

- Remove the remaining two, 6.6 mm screws to remove the battery

- Use a plastic opening tool to lift and open the back

Step 5

- Lift and pull out disk drive

To reassemble your device, follow these instructions in reverse order.
