Pièces pour why! N131WU EU (1)

Pièces pour why! N131ZU CH (1)

Pièces pour why! N131ZU EU (1)

Step 1 — Keyboard Screws

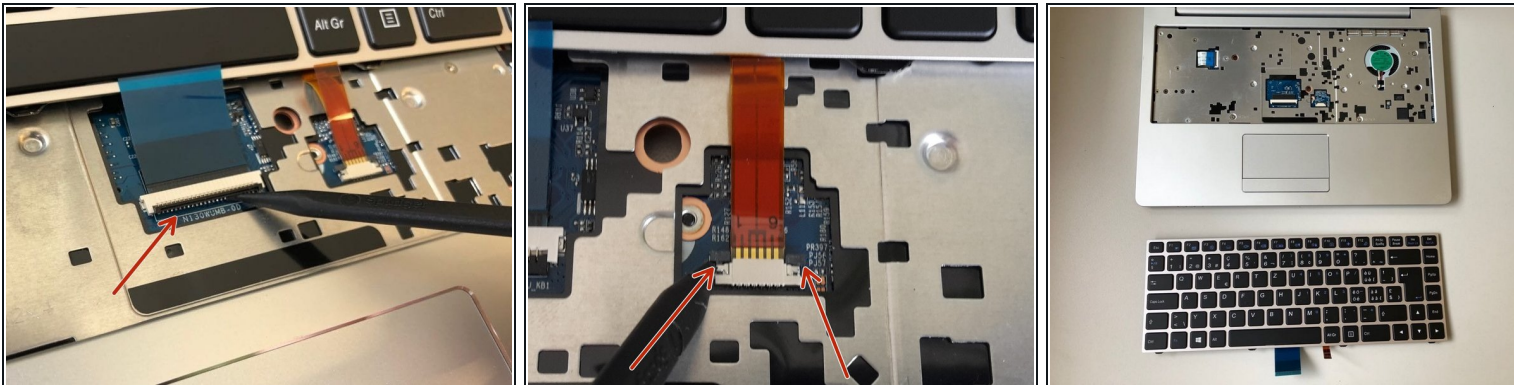

- Remove the two keyboard retaining screws.

Step 2 — Unclip the Keyboard

- Insert a small screwdriver into the holes the screws were removed from in the previous step to unclip the keyboard.

Step 3 — Disconnect the Cables

- Using a plastic spudger, flip up the retaining latch on the ZIF connector securing the blue ribbon cable, then slide the cable straight out from the connector.
- To release the orange flex cable, use the tip of a spudger to slide the latches on either side in the direction indicated by the arrows, then pull the cable straight out from the connector.

To reassemble your device, follow these instructions in reverse order.
