

ZTE Compel Battery Replacement

This guide will show you how to replace the ZTE Compel battery.

Written By: Kidron Stamper

INTRODUCTION

The ZTE Compel features a rechargeable lithium ion battery. You may need to replace the battery if it no longer holds a charge, if the battery is corroded, or if you are simply force restarting your phone. Please take all necessary precautions, such as protective gloves and eyewear if dealing with battery corrosion.

TOOLS:

- [Spudger](#) (1)
-

Step 1 — Battery

- Place the phone on a flat surface with the screen facing down. This will allow easy access to the removable black plastic cover on the back of the phone.

Step 2

- In the bottom right corner of the device, use your fingernail to remove the back cover of the phone by lifting up and holding the device with your other hand.

Step 3

- In the top-right area of the battery, use your fingernail to lift the battery out of the phone.
- ⚠ If your battery is corroded, take all necessary precautions, such as, gloves and protective eyewear.

To reassemble your device, follow these instructions in reverse order.
