INTRODUCTION

This guide will help you replace the broken black plastic battery cover that covers the battery on the Novatel Hotspot device. It involves removing the cover with a good amount of force.

Step 1 — Battery Cover

- Unplug the charger from your Novatel Hotspot device.

- Place the Novatel Hotspot device face down on a flat, clean surface.

- Place your thumb under the latch of the black plastic battery cover as shown.

- ⓘ Remove the battery cover. This will require some force.

To reassemble your device, follow these instructions in reverse order.
