

# Shark Flex DuoClean Power Cord Replacement

How to replace the power cord of the Shark DuoClean HV391 vacuum.

Written By: caoimhe

---

## INTRODUCTION

Wire cutting and soldering may be required for more info on soldering visit the iFixit [soldering guide](#).

---

### TOOLS:

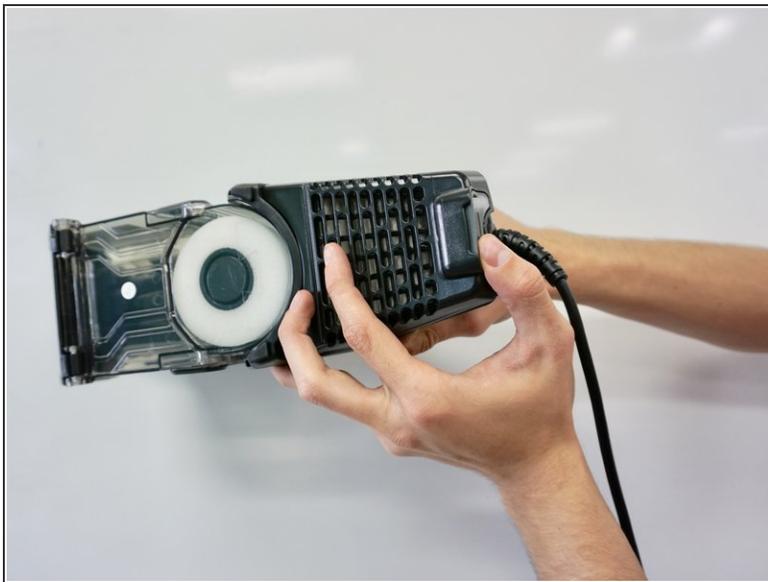

- [T10 Torx Screwdriver](#) (1)
  - [T15 Torx Screwdriver](#) (1)
  - [Flush Wire Cutters](#) (1)
  - [Soldering Iron](#) (1)
-

## Step 1 — Dust Cup

- Squeeze Dust Cup release buttons on either side of the component.
- Pull up to release Dust Cup.

## Step 2 — Power Cord

- Remove the pre-motor filter with your hands.

### Step 3

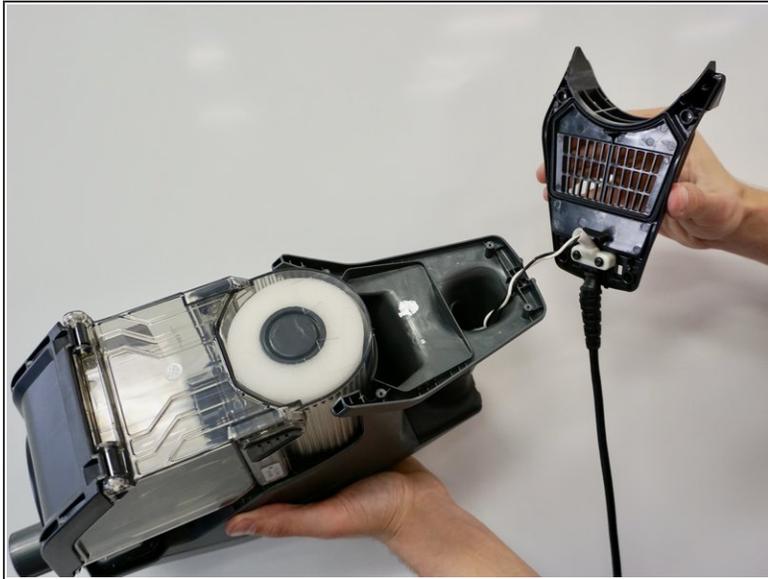

- Remove the post-motor filter.

### Step 4

- Remove the two 15 mm screws by twisting counterclockwise with the T10 Torx screwdriver.

## Step 5

- Remove the two 12 mm screws by twisting counterclockwise with the T15 Torx screwdriver.
- To fully remove the power cord, cut the wires using a wire cutter.
- ⓘ For reassembly, use the soldering guide in the Introduction.

To reassemble your device, follow these instructions in reverse order.
