

Kenwood DNX571HD CD/DVD Drive Replacement

How to remove and replace the CD/DVD module in a Kenwood DNX571HD.

Written By: Wendy Zaballos

INTRODUCTION

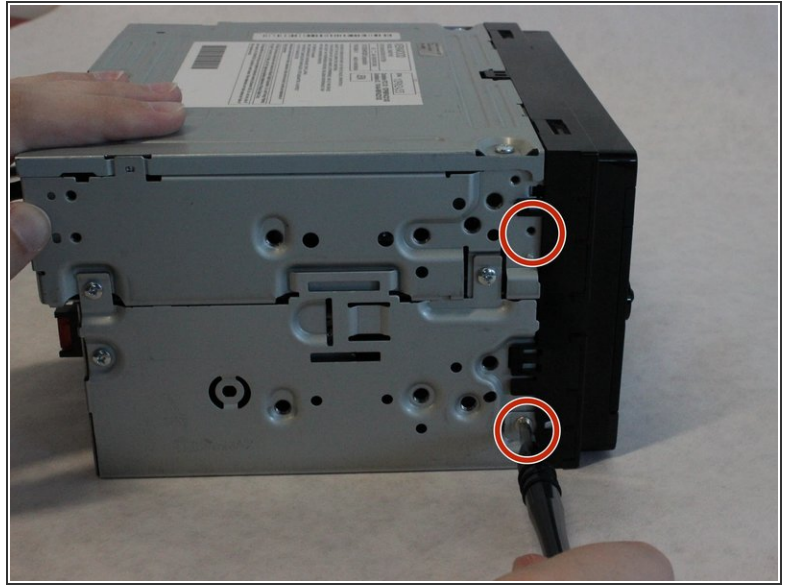

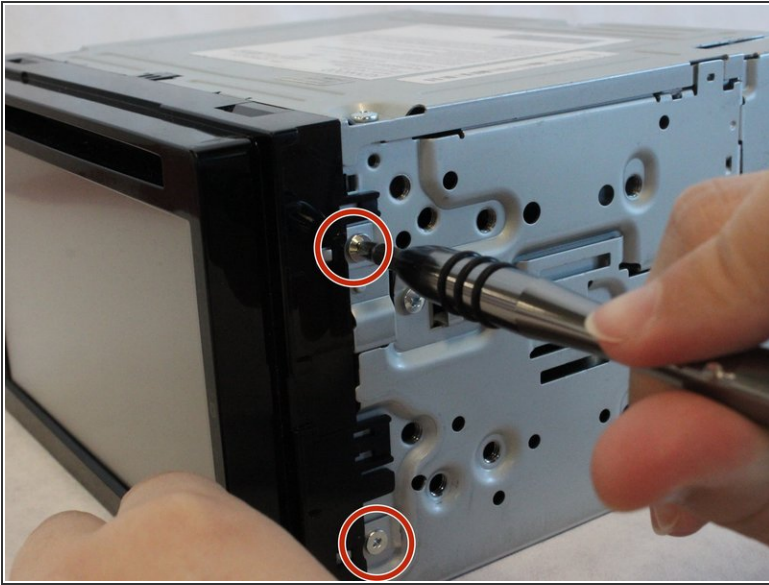

If the CD/DVD drive in your Kenwood DNX571HD car stereo has stopped working, or has physically broken, follow this guide to remove the module and replace it with a new one.

TOOLS:

- [Spudger](#) (1)
 - [Phillips #1 Screwdriver](#) (1)
-

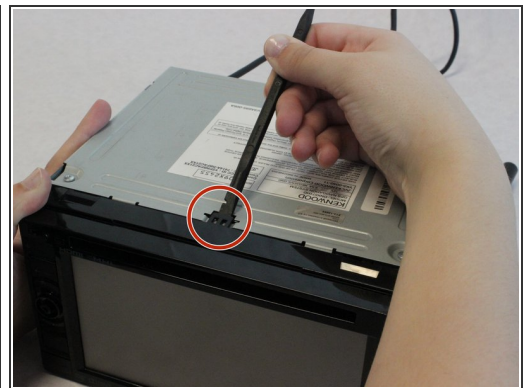

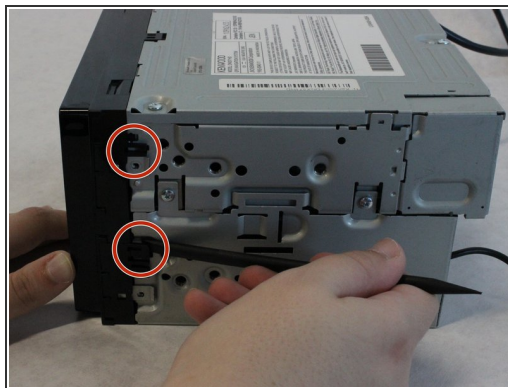

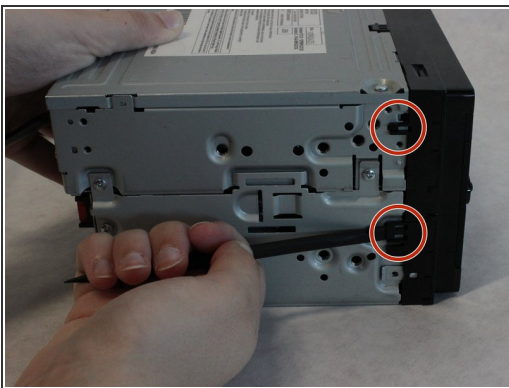

Step 1 — CD/DVD Drive

- Unscrew the four 3.5mm side screws with a Phillips #1 screwdriver.

i There are two screws per side.

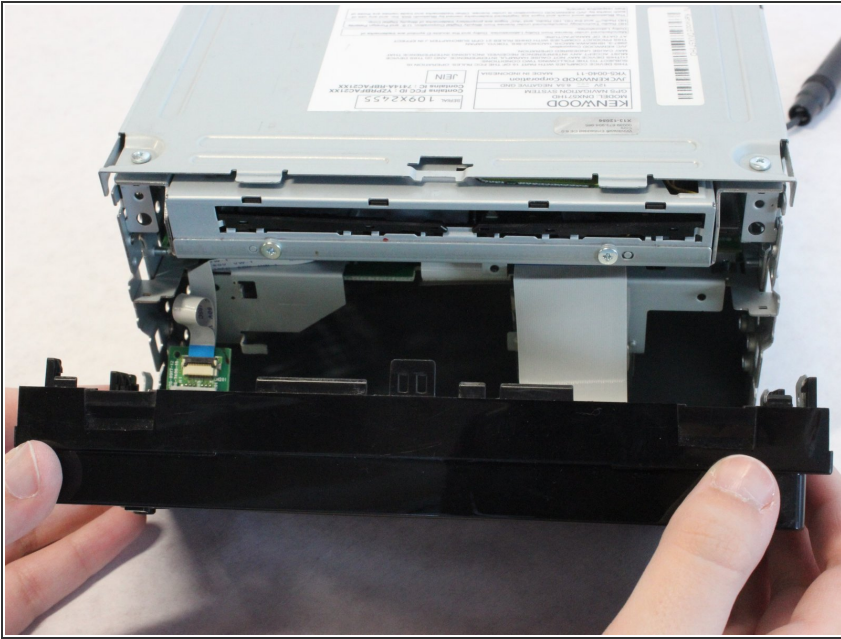

Step 2

- Use a spudger to unhook the plastic clips on the sides and top of the front panel. There are two clips on each side and one clip on the top.

i Place the spudger between the plastic tab and the metal case and gently lift the spudger away from the case.

Step 3

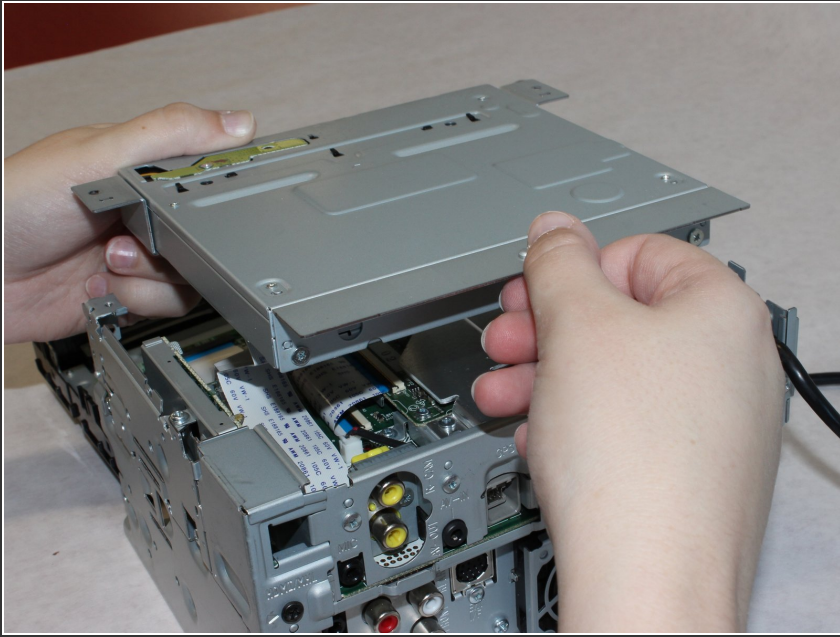

- Pull the top of the front panel out and down to remove front panel.
- ⚠ Remove the front panel gently so as not to damage the ribbon cables behind it.

Step 4

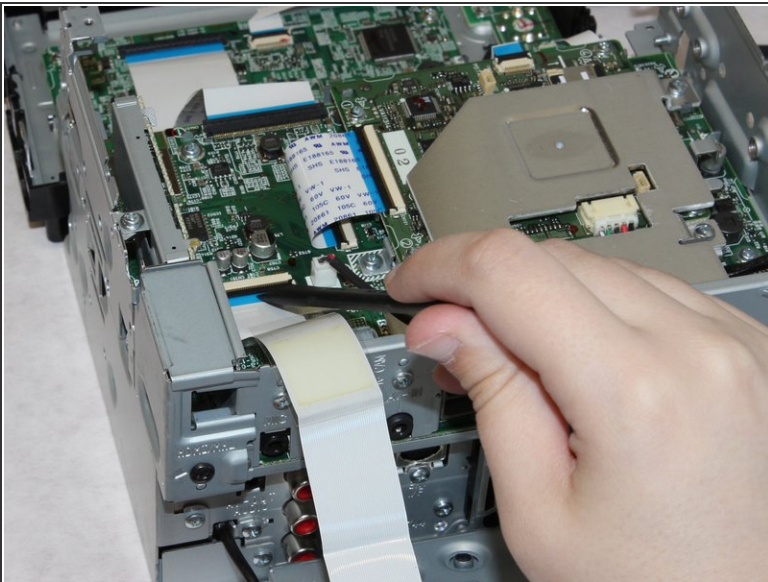

- Unscrew the three 5mm screws from the top of the device using a Phillips #1 screwdriver.
- Lift up to remove the top casing.

Step 5

 Lift the CD drive carefully to expose the attached cable underneath.

Step 6

- Flip up the black clasp with a spudger to disconnect the large white ribbon cable connecting the CD drive to the board underneath.

To reassemble your device, follow these instructions in reverse order.
