🔧 TOOLS:

- JIS #0 Screwdriver (1)
- Tweezers (1)
- iFixit Opening Tools (1)

Step 1 — Battery

- Be sure the device is turned off.

- Flip the phone onto its backside.

- Remove the back cover by using a plastic opening tool.
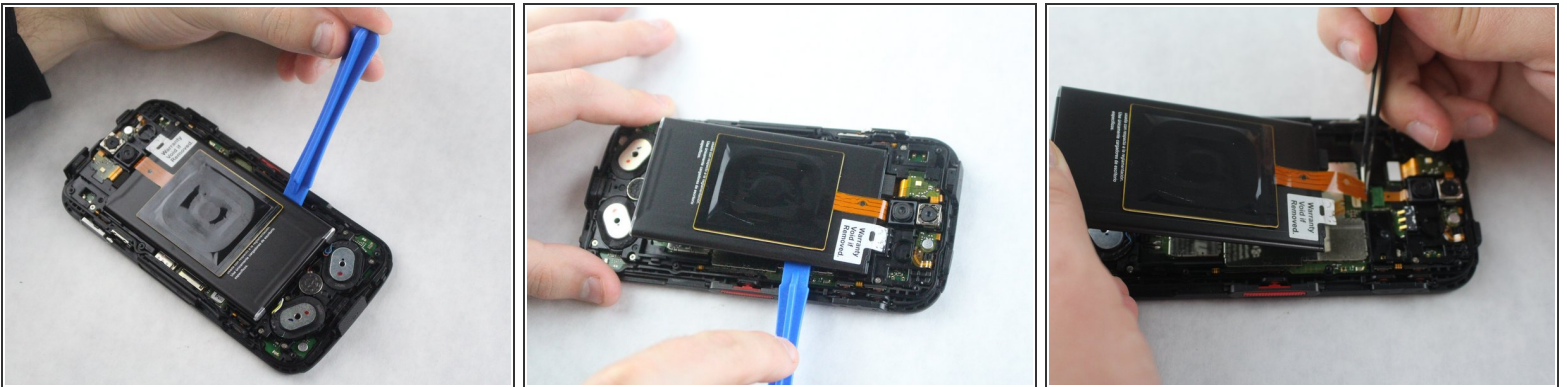

Step 2

- Remove the eight screws with a JIS #0 screwdriver.

Step 3

- Once the back cover is removed, the (6) buttons along the side are going to fall out of place.

Step 4

- Using the plastic opening tool from earlier, lift the battery out by wedging it along the edge.

- Using tweezers, unlock the ribbon cable port and lightly pull the cable upwards until it becomes unplugged.

To reassemble your device, follow these instructions in reverse order.
