Step 2

(i) Some screws may be hidden under a screw cover.

● Simply use a metal spudger to pop off the screw cover to unveil the hidden 8mm screw.

(i) Screw cover may fly when removing.

Step 3
- Once screws are removed you may now remove the optical drive.

- Remove the hidden 3mm screw in the optical drive port.

Step 7 — WiFi Card

- Once the keyboard panel is removed you will need to locate the WiFi card

Step 8

- Remove two screws using the Phillips #0 screwdriver.

This document was generated on 2020-11-23 11:25:58 AM (MST).

Step 9

- Remove wire connected to the back of the card by pulling it straight up.

Step 10
- Pull card away from you to remove it from the motherboard.

⚠️ Refrain from wiggling or moving the card around, while connected to the motherboard, to prevent damage to connector pins.

To reassemble your device, follow these instructions in reverse order.
