🔧 TOOLS:

- [Essential Electronics Toolkit](#) (1)

Step 1 — RAM

- Lay the laptop down so the bottom is facing up.

- Push the slide button, circled in photo 1, to release the battery.

- Action in picture 2 shows the direction and release.

- Tilt the battery back in the direction it popped up in and remove the battery.

- This ensures there is no power in the system that could potentially short out any components.
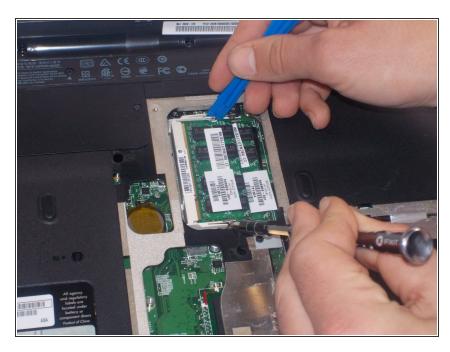

Step 2

- Remove the circled screws.

- Lift and remove the cover, exposing the RAM cards.

Step 3

- Push in the silver tabs to release the RAM.

- When they pop up from the locked position the RAM may be removed.

To reassemble your device, follow these instructions in reverse order.
