INTRODUCTION

Use this guide to access the combined battery, RAM and hard drive compartment in a Fujitsu Lifebook UH572.

TOOLS:

- T6 Torx Screwdriver (1)
- iFixit Opening Tools (1)

This document was generated on 2020-12-12 12:31:49 AM (MST).

Step 1 — Battery/RAM/HDD Door

- Remove the 6 black screws

- To lift the cap use the opening tool.
  - There is a pit.

To reassemble your device, follow these instructions in reverse order. You have to press gently the cap in the reverse direction of the arrows, so the screws fit.
