

Hover-1 Maverick Battery Replacement

How to replace the battery in Hover-1 Maverick.

Written By: Piper Feldman

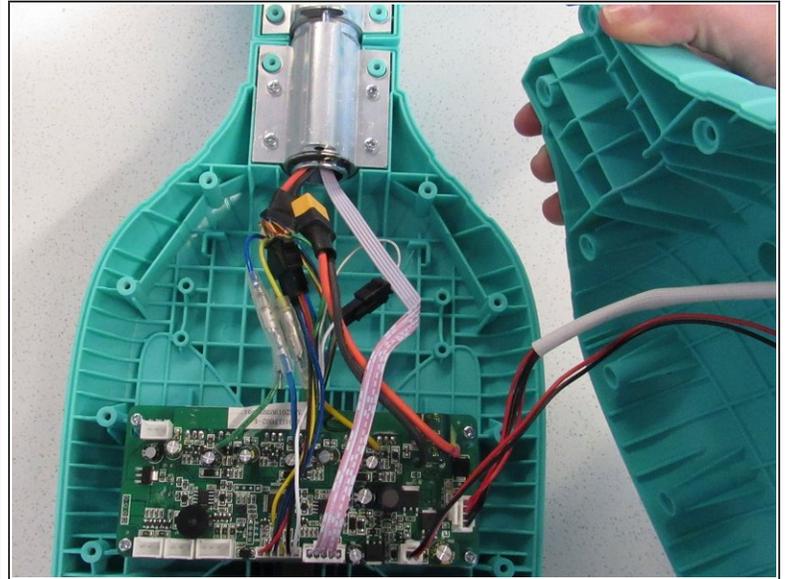

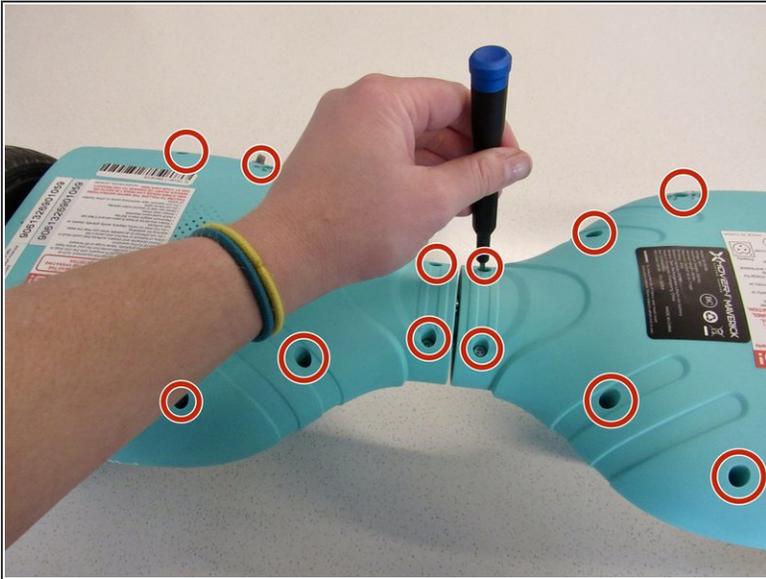

INTRODUCTION

This guide for the Hover-1 Maverick guides users in replacing the battery in their device. The battery is crucial in powering the hoverboard. Symptoms of having a faulty battery include the device not being able to move, hold a charge, or power on.

TOOLS:

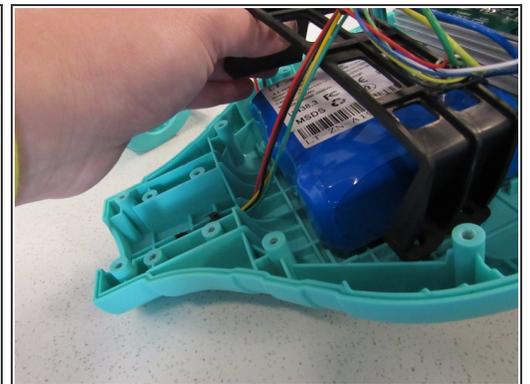

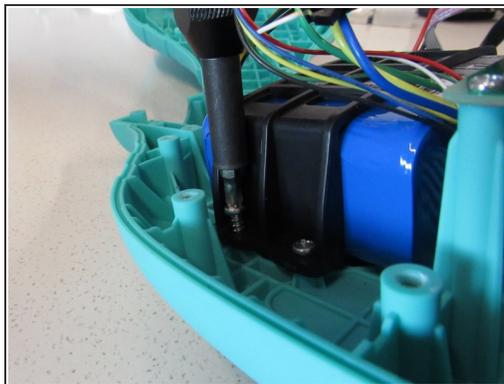

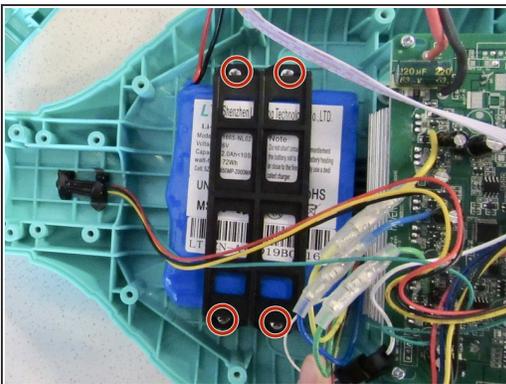

- [Phillips #1 Screwdriver](#) (1)

Step 1 — Battery

- Remove the twenty 15mm Phillips #1 screws from the shell of the hoverboard.
- Remove the shell.

Step 2

- Remove the four 8mm Phillips #1 screws holding down the black plastic casing.
- Lift off the black plastic retaining bracket.

Step 3

- Pull the battery upward lightly to remove from the device.
- ⓘ The battery is secured to the device with adhesive tape.

To reassemble your device, follow these instructions in reverse order.
