Step 1 — Back Cover

⚠️ Ground yourself by touching a metal object or surface. This prevents electrical damage to other components in the laptop.

● Remove the two 7.8 mm screws using the Phillips #0 screwdriver.

● Remove the six 5.2 mm screws using the Torx T5 screwdriver.

Step 2

ⓘ Light to moderate force is required to remove the back cover.

● Insert the Jimmy in between the frame of the laptop and the removable back cover and remove the back cover from the device.

Step 3 — Solid State Drive

- Remove the two 4.6 mm screws securing old hard drive/solid-state drive in place using the Phillips #0 screwdriver.

Step 4

- Disconnect the SATA cable connected to the old hard drive/solid-state drive.

- Remove the solid state drive.
