

# iRobot Braava Jet 240 Filter Replacement

Use this guide to replace the water filter in your iRobot Braava Jet 240, model number: B240020.

Written By: Claire Franz

## INTRODUCTION

If the filter on your iRobot Braava Jet 240 needs to be replaced, follow this guide.

The filter is located between the tank cover and the tank. The filter catches any residue that is in the water, ensuring that the iRobot Braava Jet 240 only sprays clean water. If the filter collects too much dirt, it needs to be removed and cleaned. The filter could also tear, in which case it should be replaced.

## Step 1 — Battery

- Turn the device off.

## Step 2

- Use your fingers to gently pop out the battery.

### Step 3 — Filter

- Lift the handle to access the filter.

### Step 4

- Pull up the filter cover.

## Step 5

- Insert your finger into the filter and pull it up to remove it from the device.

To reassemble your device, follow these instructions in reverse order.
