INTRODUCTION

Keyboards can be damaged when liquids are spilled on them. Without a functioning keyboard, it can be very difficult to use the Maylong MN-1000P. Replacing a keyboard is not difficult and requires only a few simple tools.

🔧 TOOLS:

- iFixit Opening Tools (1)
- Phillips #00 Screwdriver (1)
- Spudger (1)

## Step 1 — Bottom Cover

- Place the netbook top down, with the opening of the netbook facing you.

Step 2

- Remove the six 6mm Phillips #00 screws from the netbook.

Step 3

- Remove the sticker in the middle of the netbook.

- Remove the middle 6mm Phillips #00 screw.

Step 4

- Using two plastic opening tools, pry off the bottom of the netbook by going around the edges.
Step 5

- Remove the bottom of the netbook by lifting the corners.

Step 6 — Battery

- Pinch the red and black wires connected to the section closest to the small white connector, and pull to remove them from the motherboard.
