## INTRODUCTION

Use this guide to replace the battery in your Ecovacs Deebot 900 if it is malfunctioning or will not maintain a charge. The battery allows the Deebot 900 to maintain power without being plugged into a power source. It may become necessary to replace a malfunctioning battery.

Removing the battery when repairing anything inside the robot is also recommended for safety.

### TOOLS:

- [Phillips #0 Screwdriver](#) (1)
-

## Step 1 — Battery

- Remove all the brushes from the Deebot.

## Step 2

- Using a Phillips #0 screwdriver, remove the two 12.25 mm screws holding the battery cover in place.

## Step 3

- Remove the battery cover.

## Step 4

- Using the two white straps on the sides of the battery, gently remove the battery.

⚠ Be careful not to rip out the battery cable.

## Step 5

- Carefully disconnect the battery cable by pulling near the connector at the bottom of the battery compartment.

To reassemble your device, follow these instructions in reverse order.
