# INTRODUCTION

This guide shows yow to replace the display of your Samsung Galaxy M20 - SM-205FN.

---

## TOOLS:

- [Spudger](#) (1)
  - [iFixit Opening Tool](#) (1)
  - [iFixit Opening Picks \(Set of 6\)](#) (1)
  - [Phillips #00 Screwdriver](#) (1)
-

## Step 1 — Display

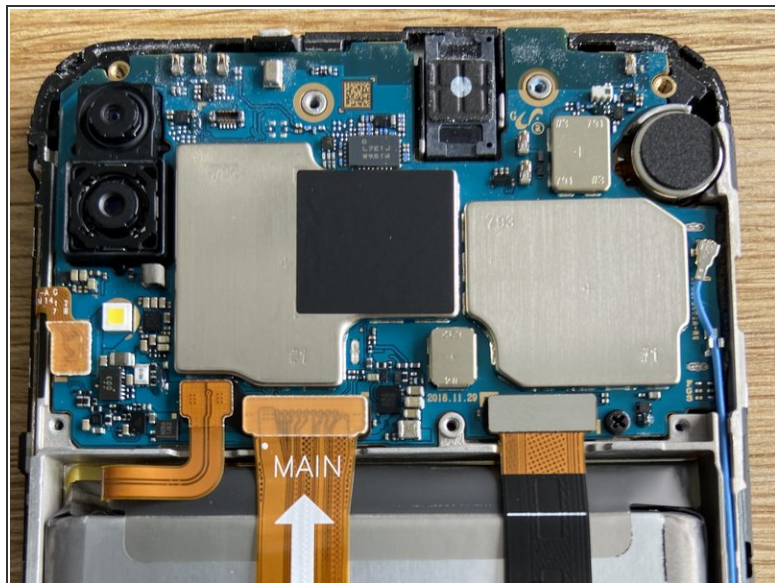

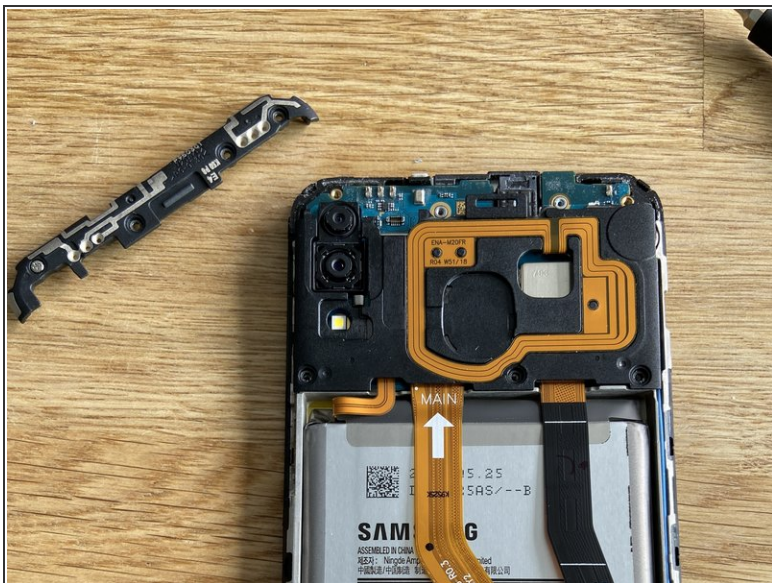

- Loosen the back cover
- To do this, start at the headphone jack and lever between the back cover and the rest of the phone.
- Keep going around the seam until the back cover is loose. Before fully taking off the back cover, carefully disconnect the fingerprint sensor's ribbon cable using a spudger or tweezers.

## Step 2

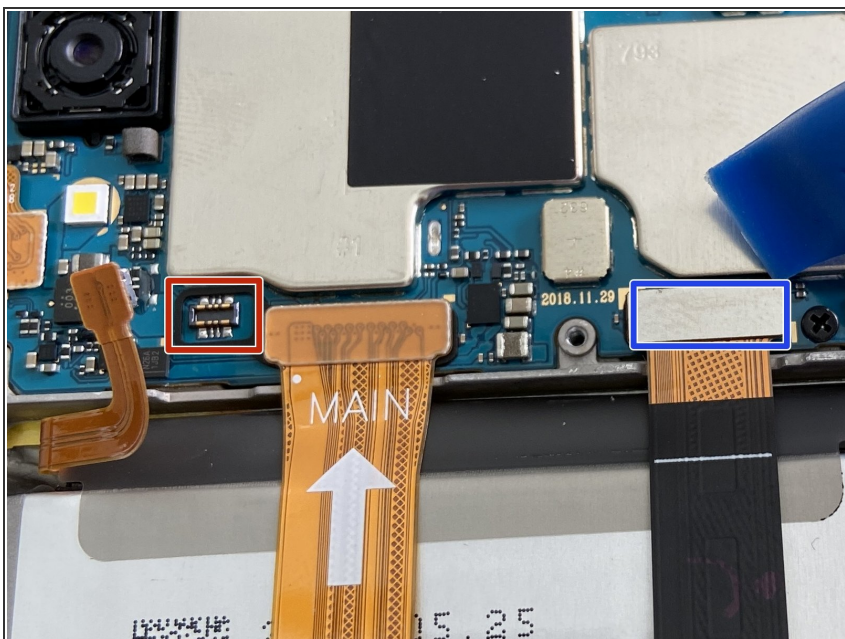

- Loosen the 7 Phillips #00 screws.

## Step 3

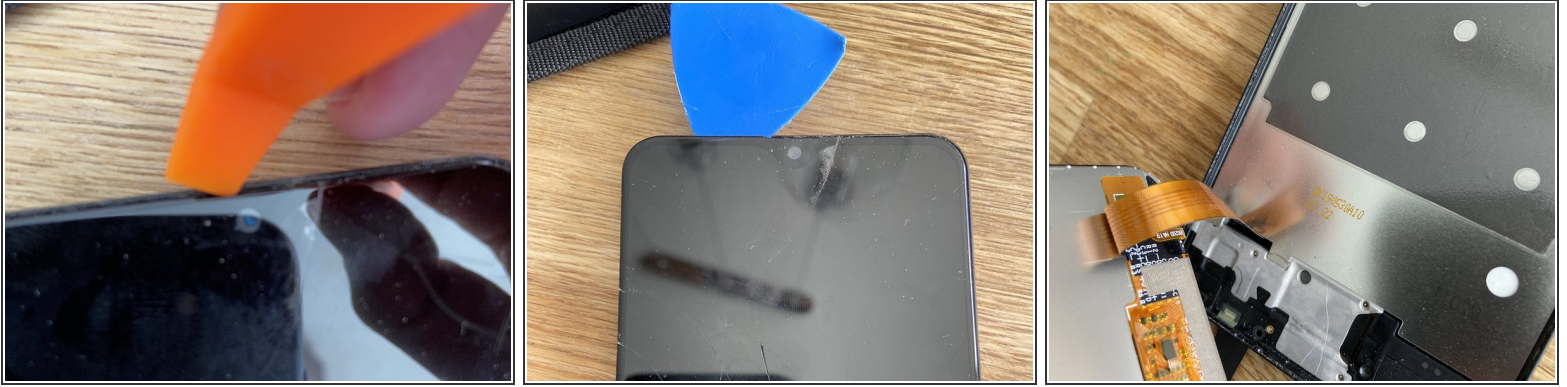

- now the covers can be removed.

## Step 4

- First disconnect the battery connector using a plastic spudger.
- Then disconnect the display cable using the same method.

## Step 5

- Now you should heat the entire front, either with a cherry stone pillow (wheat bag) or a heating plate, hair dryer, ironing on a low level is also possible if necessary.
- Then use a plastic tool to pry the top of the camera. BE CAREFUL not to break the camera. Then go around and loosen the display. Reheat if necessary.
- Pull the cable out of the slot at the bottom, clean the edges.
- FINISHED!
