INTRODUCTION

This guide demonstrates how to replace the battery in a 2016 Toyota Camry key fob.

Key fobs conveniently unlock and lock your vehicle from a distance with the click of a button. Unfortunately, after 3 or 4 years of continuous use, the battery drains and needs to be replaced.

This is a fairly simple fix that can be completed at home with nothing more than a coin!

🔧 TOOLS:

- Coin (1)

⚙ PARTS:

- CR 2016 3V Lithium Batteries (1)

Step 1 — Key Fob Battery

- Take a coin and wedge it between both halves of the key fob where the keychain notch is. Push against the indent until the fob begins to lift open.
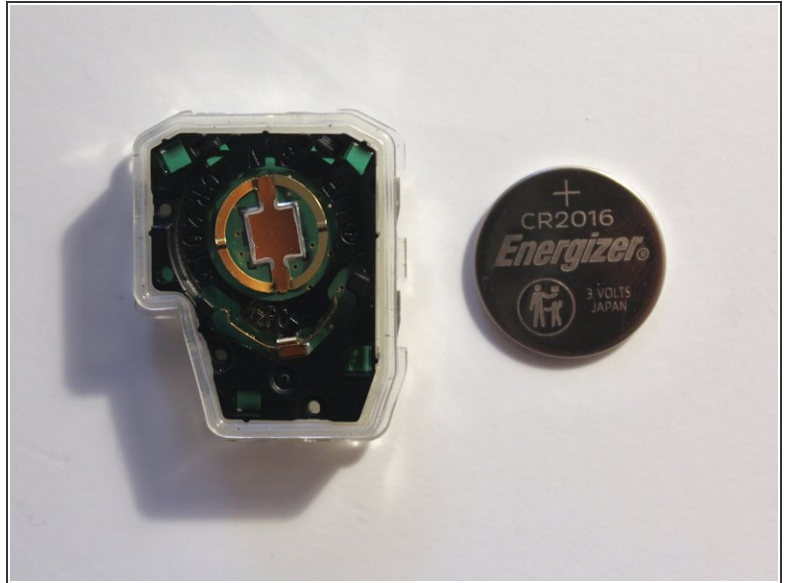

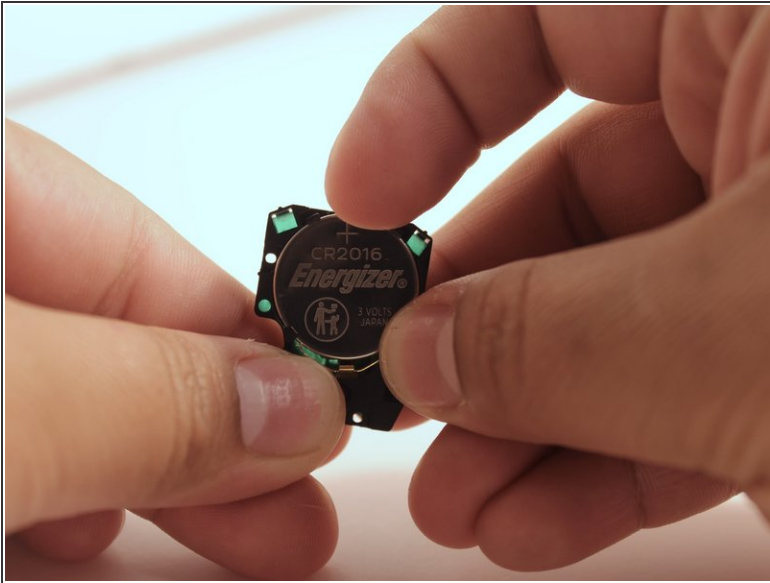

- ⓘ Take care not to lose the buttons, as they may fall out.

Step 2

- Look for the notch where it says "use coin to open." Push against the indent with your coin to separate the pieces.

- Remove the middle console.

Step 3

- Use your fingernail to pry around the battery until it pops out.

- ⊠ When inserting the new battery, make sure that the positive side is facing up.

To reassemble your device, follow these instructions in reverse order.
