🔧 TOOLS:

- Phillips #0 Screwdriver (1)

Step 1 — mSATA SSD

- Disconnect the battery and power cord from the computer.

Step 2

- Remove the two 5mm screws near the front of the computer

Step 3

- Slide the panel towards the front of the computer; it will come off easily.

Step 4

- If you have not already, be sure to ground yourself before touching any internal parts.

- Remove the single 3mm screw holding down the SSD.
