

# TomTom XXL 540 Battery Replacement

Written By: Mike Sollars

 **TOOLS:**

- [T5 Torx Screwdriver](#) (1)
-

## Step 1 — Battery

- Peel back the sticker on the bottom of the device to reveal the two screws.

## Step 2

- Unscrew the two T5 Torx screws.

### Step 3

- Wedge the flat head of the screwdriver into the edge of the device. Gently lift the screen from the cover.

### Step 4

- Release the yellow ribbon cable.

## Step 5

- Identify the green motherboard. Unscrew the three screws holding the board in place.

## Step 6

- Remove the motherboard from the back plate.

## Step 7

- Unplug the battery from the board.

## Step 8

- Plug the new battery into the white receptacle on the green motherboard.

## Step 9

- Transfer the green motherboard back into the back plate and secure it with the 3 screws.

## Step 10

- Reconnect the yellow ribbon cable and connect the screen and back plate back together.

## Step 11

- Insert the t-5 screws and tighten to secure.

## Step 12

- Replace the label to cover the screws.

To reassemble your device, follow these instructions in reverse order.
