# INTRODUCTION

If you need to replace your HP Laptop (HP Pavilion dv6-1245dx) battery, use this guide.

The battery supplies power to the device, enabling it to work without a power cord. The laptop will either be drained of power faster or won't power on with a faulty battery. Eventually, laptop batteries will rapidly drain after going through a repeated amount of charge cycles. If the battery drains faster than usual, you should replace your battery.

A punctured battery can cause a dangerous fire. If your battery is swollen, [take appropriate precautions](#).

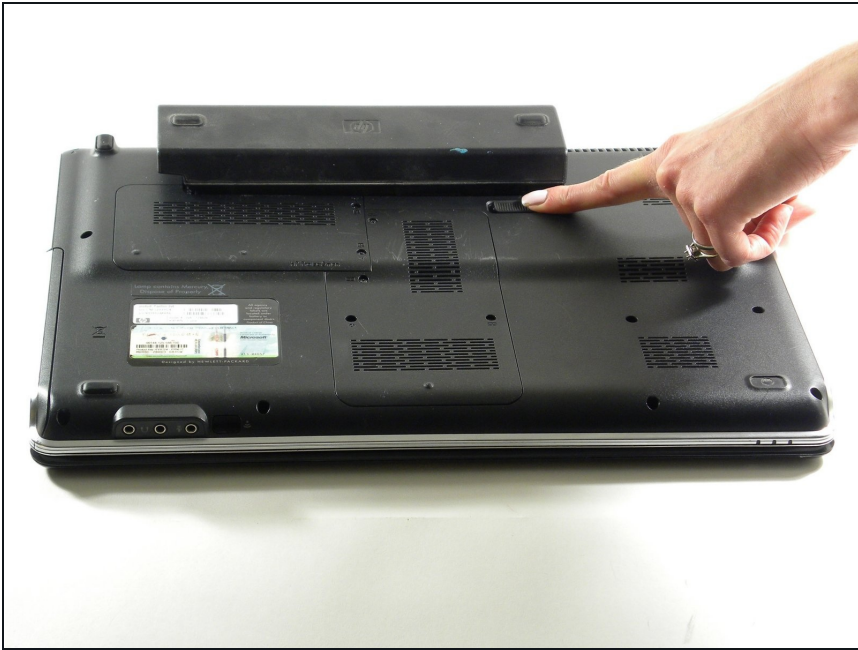

Before using this guide, make sure to turn off any external source of power connected to your device.

## Step 1 — Battery

- Shut down the computer and unplug it from the outlet.

## Step 2

- With the battery facing away from you, slide and hold the battery release latch to the left.

## Step 3

- While holding the release, lift the battery away from the battery bay.

## Step 4

- Place the new battery into the battery bay, making sure the connectors are lined up so the battery can click into place.

---

To reassemble your device, follow these instructions in reverse order.
