

# Acer Aspire 5253 Hard Drive Replacement

After you remove the back cover panel its not...

Written By: Cynthia Barajas

# INTRODUCTION

After you remove the back cover panel its not too difficult to slide the ram out of the laptop.

---

## TOOLS:

[Phillips #00 Screwdriver](#) (1)

[iFixit Opening Tool](#) (1)

---

## Step 1 — Battery

- Turn the laptop over.

## Step 2

- "Unlock" your battery by moving the switch as shown so that an unlocked lock on a red background is shown.

## Step 3

- Next move the other switch, while the unlocked symbol is still showing. The battery should pop up, and no longer be flush with the bottom of the laptop.

## Step 4

- Now remove the battery by lifting it out of the laptop by the side closest to the switches.

## Step 5

- You have successfully removed the battery. Congratulations!

## Step 6 — Back Cover Panel

- Now, locate the two screws that hold the back cover panel onto the laptop.

## Step 7

- Unscrew both of the screws that are holding the back panel in place with the Philips #00 head.
- ⓘ The screws are 3/8" in length and have a 1/4" head.

## Step 8

- Once both screws have been removed use a plastic opening tool to lift the panel up. Starting with the indented notch , and moving left and right from there.

## Step 9

- After the panel has been loosened by the plastic opening tool, take your finger, place it in the gap, and remove the panel from the laptop.

## Step 10 — Hard Drive

- Once the cover panel is off, locate the hard drive.

## Step 11

- Locate the two screws that are holding the hard drive in place.

## Step 12

- Remove the two screws using a Phillips #00 screw driver.

## Step 13

- Carefully slide the hard drive in the opposite direction of where the screws are located until it dislocates.

## Step 14

- Pull the hard drive out of its compartment.

---

To reassemble your device, follow these instructions in reverse order.
