INTRODUCTION

This will allow you to properly remove and replace the keyboard.

TOOLS:

- iFixit Opening Tools (1)
- Phillips #1 Screwdriver (1)
- Anti-Static Wrist Strap (1)

PARTS:

- Dell Latitude D820 Keyboard (1)

Step 1 — Battery

- Remove the charger from the laptop.

- Turn the laptop over and locate the battery slide lock. Slide the switch and gently lift up the battery.

- If you are replacing other components, leave the battery out.

- If you are only replacing the battery, reverse the steps to install a new battery.
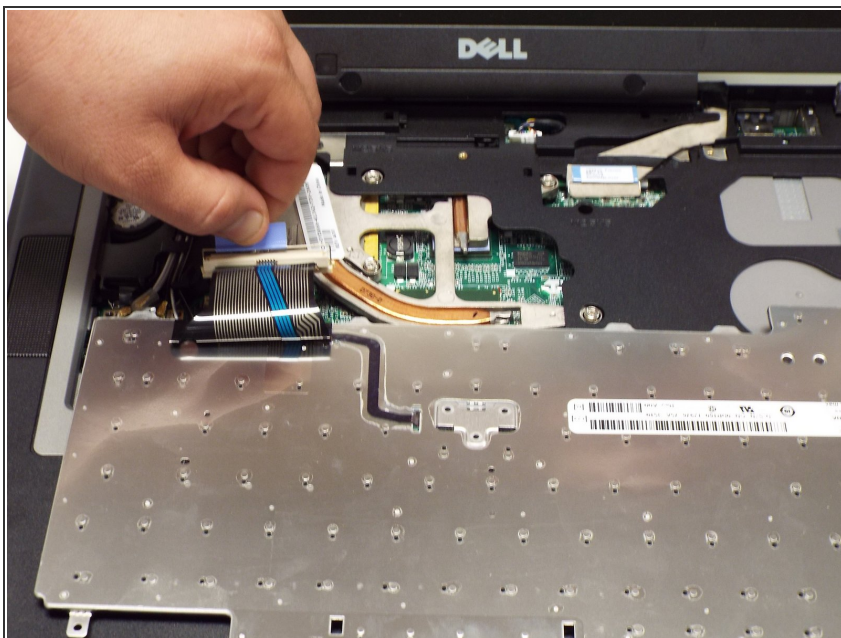

Step 2 — Keyboard

- Open laptop lid and extend screen until it is parallel with the keyboard.

- Locate the notch in the upper right corner of the keyboard (just above the 'page up' button).

- Insert the plastic spudger and very gently lift the faceplate. It will make a soft snapping sound.

- Set aside.

Step 3

- Locate the three philips head screws above the keyboard. One is above the 'Pause/Break' key; one above the F7 key and one above the 'Esc' key. Remove all three.

Step 4

- Gently lift top of keyboard and lay forward on palm rest.

- Locate blue pull tab and gently disconnect ribbon cable from motherboard.

To reassemble your device, follow these instructions in reverse order.
