## INTRODUCTION

This guide teaches you how to remove the battery cover and batteries.

## Step 1 — Removing The Battery Cover.

**⚠** Before attempting to remove batteries, make sure the device is turned off.

- Locate the battery compartment on the back of the AlphaSmart Pro.
- Push the tab inward and lift up. This will detach the cover from the device.

## Step 2 — Removing The Batteries

- Remove each battery by using your fingers or the spudger to pry them from the compartment.

To reassemble your device, follow these instructions in reverse order.
