Step 1 — Front Panel

- Open the battery door by sliding the tab on the battery door while pushing the battery door away from the camera.

- Remove batteries.

Step 2
- Remove the three indicated .2mm screws using a Phillips #00 screwdriver.

- Gently pull off side-panel to remove it.

Step 3

- Remove the two indicated .2mm screws using a Phillips #00 screwdriver.
Step 4

- Remove the indicated .2mm screw using a Phillips #00 screwdriver.

- Remove the three .2mm screws located on the internal side of the top panel within the battery chamber using a Phillips #00 screwdriver.
Step 5

- Open 'DIGITAL A/V OUT' door on camera.

- Remove the two indicated .2mm screws using a Phillips #00 screwdriver.

Step 6

- Grip the sides of the top panel and gently pull to separate the top panel from the camera body.

- ⓘ The top panel will not completely detach.

Step 7

- Gently pull the front and back panels apart, and use a Phillips #00 screwdriver to remove the screw connecting the panels.

- Gripping the top and bottom, gently pull the front panel away from the camera body to remove it.
Step 8 — Shooting Mode Dial
- Pry open the connector on the yellow ribbon cable using a plastic opening tool.

This document was generated on 2020-11-28 04:34:00 AM (MST).

Step 9
- Remove the 2 mm screws from the metal plate.

Step 10

- Pull away the metal plate, exposing the underbelly of the mode dial.

⚠ Be careful not to pull too hard. Metal plate should remain attached.

Step 11

- Remove the 2mm screw using the #00 Phillips screwdriver.

- The mode dial should fall out.

To reassemble your device, follow these instructions in reverse order.
