

LG Optimus L9 P769 Battery Replacement

Replace your damaged or dying battery to bring power back to your LG Optimus L9 P769.

Written By: Paul

INTRODUCTION

For this repair you do not need any additional tools other than your finger. You should attempt this repair if your phone keeps losing power, does not hold a charge, or gets extremely hot to the touch. You should be careful to not damage the back case when taking it off.

Step 1 — Position

- Position the phone face-down.

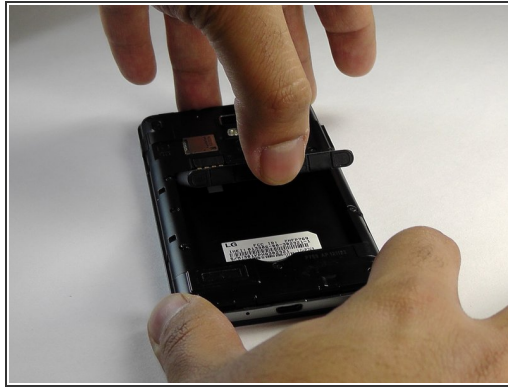

Step 2 — Rear Case Removal

- Hold the phone in your hand and position your fingernail or a opening tool under the lip at the bottom of the case.
- Pry rear case upwards until you hear a click.
- Remove rear case.

Step 3 — Battery Removal

- Place the phone face-down.
- Place your thumb or tool in the indentation and remove the battery.

To reassemble your device, follow these instructions in reverse order.
