

Petzl E03 050 Headlamp Lens Piece Replacement

This guide will describe the steps necessary to replace a damaged or dulled lens piece.

Written By: Mike

INTRODUCTION

Does your headlamp produce dim lighting despite a fresh set of batteries and a bulb? You may need to replace the lens piece - especially if the reflective mirror has become damaged or dull.

PARTS:

- [Petzl E03700 Clear Lens and Reflector Assembly for E03 Micro](http://www.karstsports.com/pete0clearle.html#.VGzv1K1HA9U) (1)

-

Step 1 — Extend the Damaged Lens Piece

- Remove the damaged lens piece by rotating the lens piece counterclockwise (left) until the lens piece is fully extended.

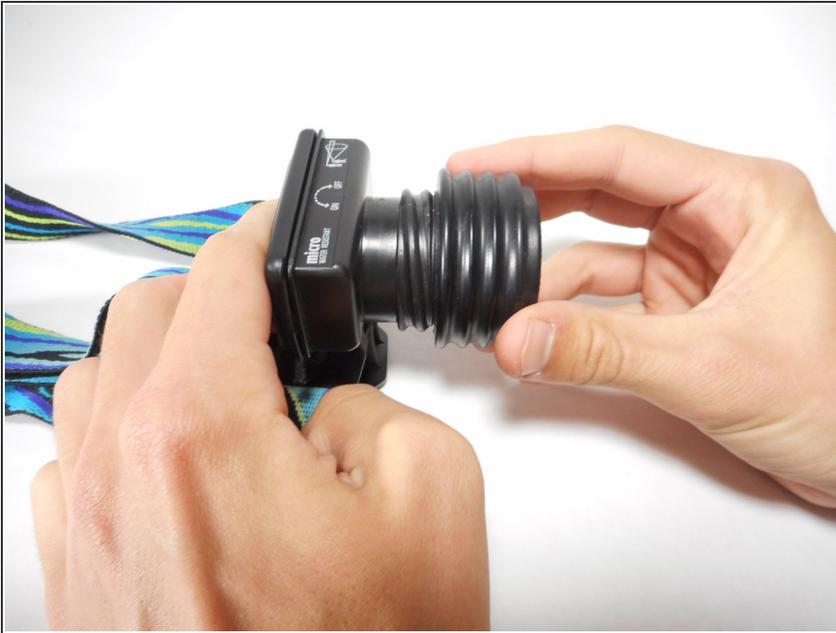

Step 2 — Remove the Lens Piece

- Remove the extended lens piece by firmly pulling the lens piece away from the battery housing. Take care

to properly dispose of the damaged lens piece.

Step 3 — Attach the New Lens Piece

- Attach the new lens piece by firmly pressing the open end of the lens piece onto the battery housing.

Step 4 — Secure the New Lens Piece

- Secure the new lens piece onto the battery housing by turning the lens piece clockwise (right) until the headlamp turns on. You have just successfully replaced the lens piece.
