Step 1 — Back Cover

- Remove one 2.25mm screw on the bottom.

Step 2

- Remove two 2.25mm screws on the right side looking from the front.
Step 3

- Remove one 4.7mm screw on the side with the AV output.
Step 4

- Pull off the back cover.

- (i) The back cover tends to stick in the top corner (near the mode dial) due to a metal clip. Jiggle the cover side to side as you pull it out.

Step 5 — Front Cover

- Remove the 3.9mm screw in the AV housing on the left side from the front of the camera.

Step 6

- Remove one 2.25mm screw on the bottom of the camera.
