

Lite-On iHAS324 Disc Tray Belt Replacement

Written By: Kayla Culpepper

TOOLS:

Paper Clip (1)
Phillips #2 Screwdriver (1)
iFixit Opening Tool (1)
Tweezers (1)

Step 1 — Chassis

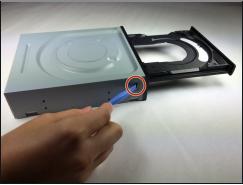

- Insert a paper clip into a small hole on the right side of the faceplate bellow the disc tray.
 - (i) There may be resistance, do not be afraid to use force.
- The tray should then pop open.
- Pull out the tray so that it is fully extended.

Step 2

• Use a plastic opening tool to push the three tabs located on the right, left, and bottom side of the outer chassis to loosen the faceplate off.

Step 3

- Pull the faceplate off the chassis.
- ⚠ Do NOT pull the faceplate all the way off the disc tray, because doing so can cause damage to the faceplate.
- i There may be resistance, do not be afraid to use force.

Step 4

 Using the Phillips Head #2 screwdriver, unscrew the two 8.5 mm screws located on the bottom back of the chassis.

Step 5

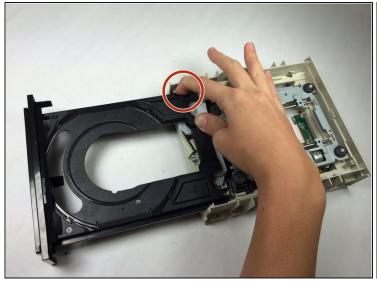

• Remove the bottom plate by lifting it off the device.

Step 6

- Turn the device over.
- Remove the top plate by pulling the sides and lifting the plate off.

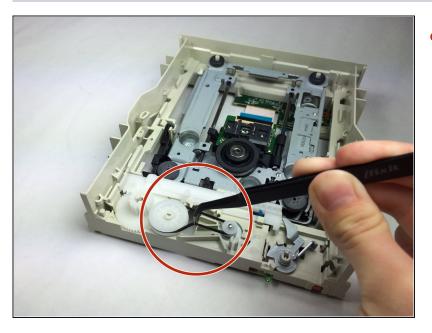

Step 7 — Disc Tray

- Push the left tab in and slide the tray out on the left side.
- Pull the gray plastic casing on the right side away from the tray.
- Slide the right side of the tray out.

Step 8 — Disc Tray Belt

 Take <u>tweezers</u> and remove the black tray belt from the gears carefully.

To reassemble your device, follow these instructions in reverse order.
