INTRODUCTION

This guide will show you how to replace the battery in an Android Nobis NB09 tablet.

Some possible symptoms which could show that your tablet's battery is dying include:

- Battery is at a low percentage even after a fresh charge.
- The tablet dies when it still has a lot of battery life.
- The tablet becomes hot after using for a short period of time.

If you experience any of these symptoms, then it is likely the culprit is a failing battery.

TOOLS:

- Spudger (1)
- iFixit Opening Tools (1)
- 64 Bit Driver Kit (1)
- Soldering Iron (1)

Step 1 — Battery

⚠ Before beginning this process, make sure the device is powered off.

● Remove the screws holding the case together.

Step 2

● Use an opening tool to loosen and pry off the pink back plate.

Step 3

- Remove the black electronic tape covering the circuit board.

Step 4

- Use the soldering iron to remove the black and red wires from the circuit board.

- ⓘ The black wire is the ground and the red wire is the battery positive terminal.

- ⭐ To reassemble, use the soldering iron to solder the leads at the end of the black (-) and red (+) wires from the new battery onto the proper terminals on the circuit board.

Step 5

- Gently loosen the adhesive under the battery to avoid damaging it.

⚠ Use caution; the battery is soft and will bend very easily.

ⓘ Dispose of the old battery properly at an electronic waste center or verified battery recycling store.

📌 When reassembling, apply adhesive to the back of the new battery.

To reassemble your device, follow these instructions in reverse order.
