Step 1 — RAM
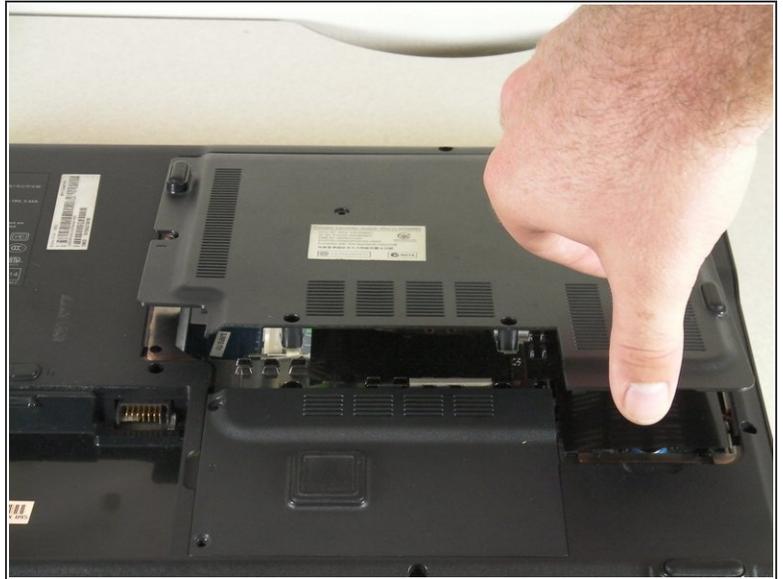

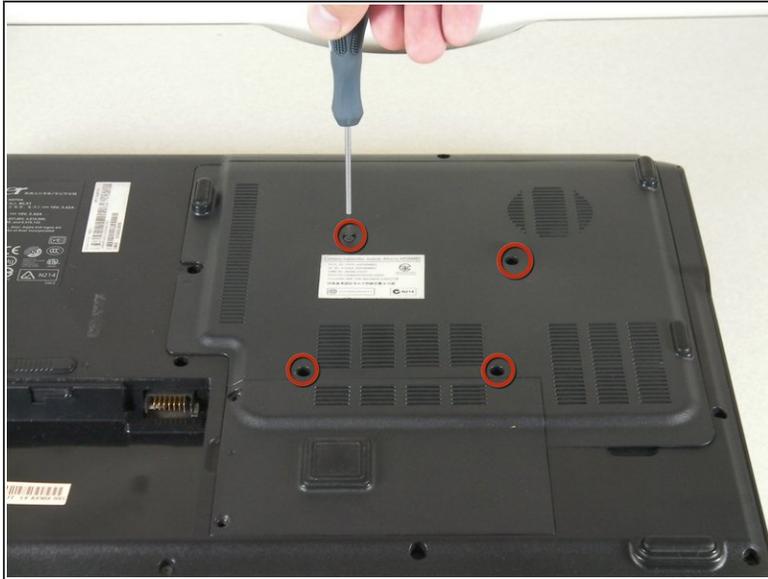

- Remove the screws on the large panel.

- Lift up the panel.

Step 2
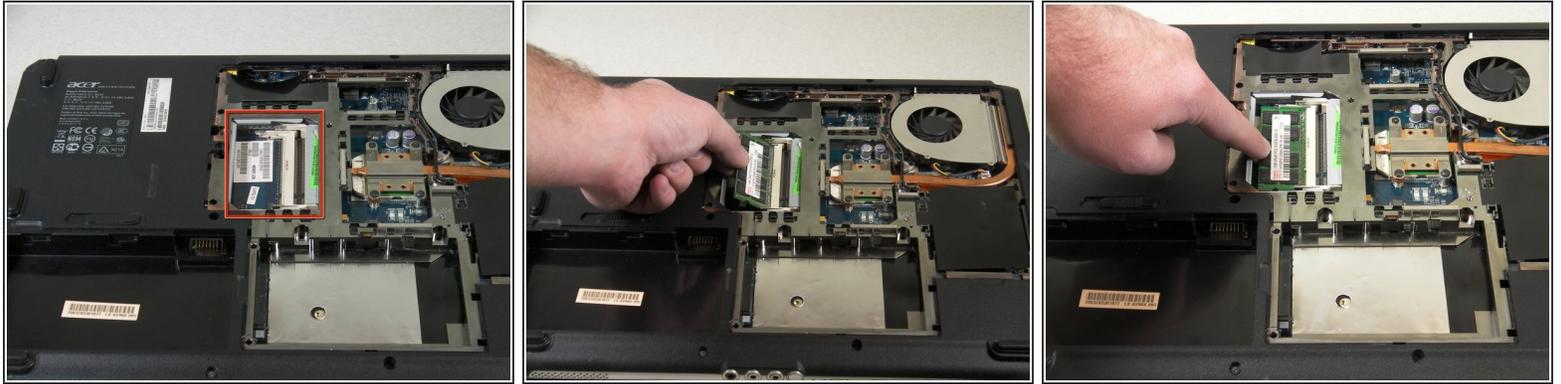

- The RAM slots are located in the corner opposite to the cooling fan.

- (i) To remove existing RAM cards: there are clips holding the sides of each card. Simultaneously spread both right and left clip and the card will pop upward. Then it can easily be pulled out.

- Slide in the RAM at a 45 degree angle.

- Press down on the RAM until it snaps into place.

- ⚠ A good amount of pressure is needed to snap it in place.

- (i) Install the RAM in the left (lower) slot before installing RAM in the right (upper) slot

To reassemble your device, follow these instructions in reverse order.
