

Etekcity Lasergrip 1080 Battery Replacement

The battery is dead and the device won't turn on. If this is the case, the battery will need to be replaced.

Written By: Patrick Crawford

INTRODUCTION

This guide will teach you how to replace the battery if it is dead. It will require no tools and has no hazards.

Step 1 — Battery

- Pull the battery cover away from the handle by gripping near the thumb groove.

Step 2

- Gently pull the battery out of the handle.
- ⚠ Excessive force could damage wires.

Step 3

- Disconnect the battery by pulling the connector away from it.

- Positive first
- Negative second

⚠ When replacing the battery, this order is reversed.

To reassemble your device, follow these instructions in reverse order.
