INTRODUCTION

Upgrade the RAM in your laptop.

🔧 TOOLS:

- Spudger (1)
- Phillips #0 Screwdriver (1)

Step 1 — Bottom Panel

- Remove the twelve 3 mm bottom panel screws with a [T5 Torx Screwdriver](#).

Step 2

- Use a plastic opening tool to pry along the perimeter of the bottom panel until it can be easily removed.

- Remove the bottom panel from the body of the laptop.

- Set aside the bottom panel.

Step 3 — RAM

- Push away the RAM retaining arms from the RAM chip.

  ⓘ The RAM chip will spring up once the retaining arms are pushed away from the chip.

- Remove the RAM chip completely.

To reassemble your device, follow these instructions in reverse order.
