Step 1 — Battery

- Flip laptop upside down and locate the battery as shown in the images.

- Push in the tab on the battery and lift up. The battery should detach very easily.

Step 2 — RAM

- Remove the single screw securing the RAM compartment and pull up to reveal the RAM.

Step 3

- Push on the small white metal tabs on both sides of a module to unlock it.

- The RAM should be stick out at approximately a 45 degree angle. Grasp the RAM by the sides and pull straight out to remove it.

  - ⓘ If the RAM sticks slightly, wiggle it back and forth gently to loosen it.

To reassemble your device, follow these instructions in reverse order.
