

External Cover Replacement Guide

Remove the external cover off the Digital2 D2-912.

Written By: Jason Wignot

INTRODUCTION

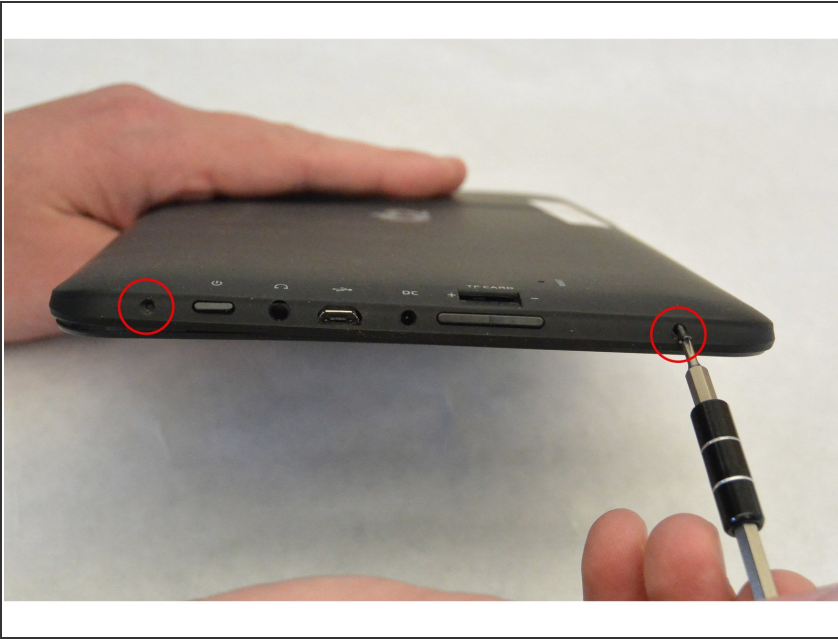

Removing the cover from the Digital2 D2-912 will help aid in replacing the motherboard of this device. Complete this teardown procedure before moving on to replace the motherboard.

TOOLS:

- [Phillips #00 Screwdriver](#) (1)
-

Step 1 — External Cover

- Remove the two Phillips #00 screws from the bottom of the case.

Step 2

- Wedge the opening tool in the space between the back and the front of the tablet.
- Carefully work your way around the perimeter, wedging the opening tool between the front and back of the tablet.
- When the back of the tablet is mostly detached from the front, carefully pull it away completely.
