

# Samsung Instinct Motherboard Replacement

This guide shows how to remove the motherboard so that a replacement motherboard can be installed.

Written By: Brayton

---

# INTRODUCTION

This guide shows all the steps leading up to, and including, the removal of the motherboard.

---

## TOOLS:

- [Phillips #00 Screwdriver](#) (1)
  - [iFixit Opening Tools](#) (1)
-

## Step 1 — Battery

- Apply pressure to the back cover and slide it forward towards the camera.
- Lift the back cover off the phone.

## Step 2

- Holding the phone firmly, use the notches to grip and lift up the battery.

## Step 3 — Back Case

- Remove the four 4.45mm screws at the corners of the phone.

## Step 4

- Use the plastic opening tool to unhook the locks around the edges of the phone.
- ⓘ Do not worry about the inner components of the phone; they are not connected to this case.

## Step 5

- Lift the casing off of the phone.

## Step 6 — Antenna

- With the screws removed, locate the antenna.

## Step 7

- Using a Phillips head screwdriver, remove the 4.50mm screw holding the antenna in place.

## Step 8

- Using the plastic opener tool, squeeze gently on the antenna cable connector and lift to remove the connector from its position.

## Step 9

- Gently lift up on the antenna and remove it from the back of the device.

## Step 10 — Front Case

- Remove the two 3.50mm screws connecting the motherboard to the case.

## Step 11

- Use the plastic opener tool to detach the three ribbons on the motherboard.

## Step 12

- Lift out the top right ribbon from its slot on the motherboard.

## Step 13

- Use the plastic opener tool to unhinge the the locks on the side of the motherboard connecting it to the front casing.

## Step 14

- Lift the motherboard away from the front casing.

## Step 15

- After removing lifting up on the motherboard, the front casing and center frame should be separated as shown.

## Step 16 — Motherboard

- Using the plastic opener tool, gently pry away the side strip control buttons from the metal center frame.

**i** There are three strips total: one on the right, left, and top of the phone.

## Step 17

- Using the plastic opener tool, pry the speaker connector away from the back of the motherboard.

## Step 18

- Using the plastic opener tool, remove the speaker from its setting.
- ⓘ Pry where the wire enters the speaker.
- ⓘ The speaker has adhesive on the bottom, thus removing it will require a bit of wiggling.

## Step 19

- Gently lift the motherboard from the center frame.

To reassemble your device, follow these instructions in reverse order.
