INTRODUCTION

Don't know how to remove your HP's keyboard? This guide shows you the steps to successfully remove your HP's keyboard to allow you to replace it.

🔧 TOOLS:

- Phillips #0 Screwdriver (1)
- Spudger (1)

Step 1 — Keyboard

- Unscrew all screws on the back of the laptop.

- ⓘ There should be a total of 22 screws.

Step 2

- Remove all the protective covers such as the RAM protective cover.

- Then remove the battery by pushing up on the battery release switch and pull the battery out.

Step 3
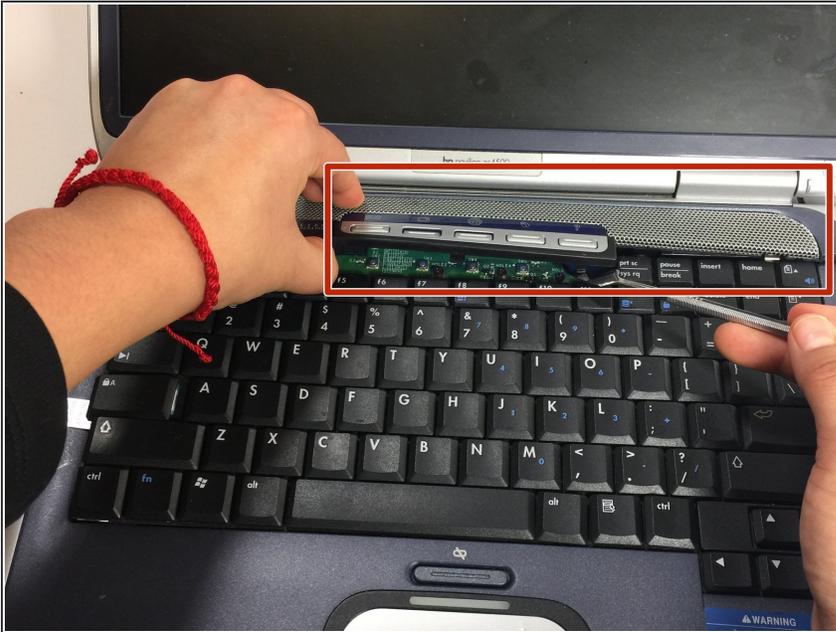

- Wedge open the top panel located above the keyboard.

- ⓘ This piece will not come off.

- 5 screws should be visible under the lifted panel. Unscrew all screws attaching the keyboard to the laptop.

Step 4
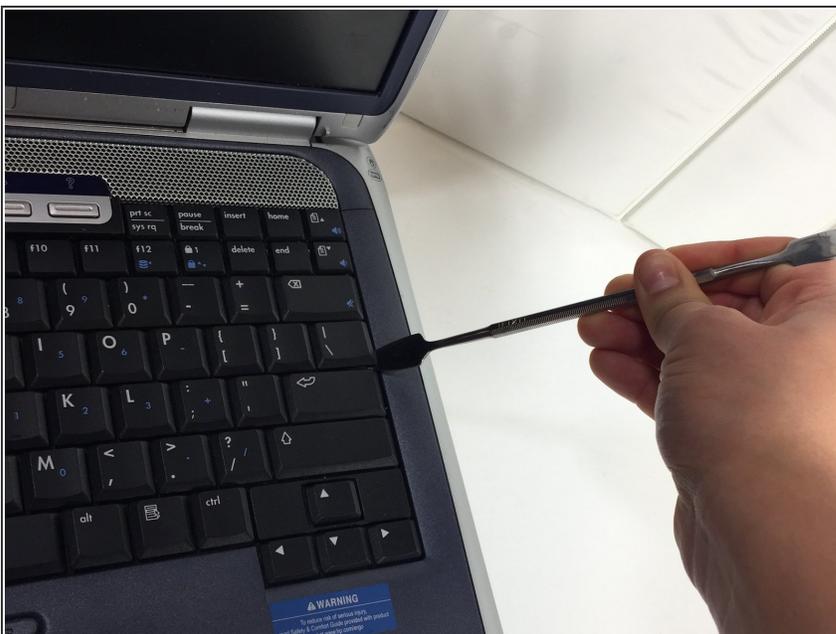

- Once all the screws are taken out of the top portion of the keyboard, wedge open the keyboard on all sides of the keyboard.
