

# HP Mini 110-3131dx Keyboard Replacement

Replace unresponsive keyboard with a new keyboard for your HP Mini 110-3131dx

Written By: aarondcollege

---

 **TOOLS:**

- [Phillips #1 Screwdriver](#) (1)
  - [iFixit Opening Tool](#) (1)
-

## Step 1 — Battery

- Power off the laptop before trying to remove the battery.
- Turn the laptop upside down, and locate the sliding tabs on the battery.
- Slide both tabs in an inward direction, then slide the battery away from the laptop.

## Step 2 — Back Cover

- To remove the bottom cover pull the orange tab to the right until it clicks.
- Carefully disconnect the clips as you lift the bottom cover.

## Step 3 — Keyboard

- Remove the three black screws marked by the keyboard symbol using a Phillips #1 screwdriver.

## Step 4

- Turn the laptop upright and open it.
- Disconnect the clips located around the perimeter of the keyboard.
  - Slide the iFixit opening tool between the top edge of the keyboard and the plastic bezel.
- ⓘ Start either above the esc key or the delete key.
  - Pull the keyboard with your fingers until it comes out on both sides.

**⚠ Be careful not to pull the keyboard out too fast. There is a fragile ribbon cable that attaches to the motherboard behind the keyboard.**

## Step 5

- Tilt the keyboard toward you to reveal the ribbon cable.
- Lift up the black tab on top of the keyboard ribbon cable to release the ribbon cable.
- Pull the ribbon cable out of its container.

To install a different keyboard, follow these instructions in reverse order.
