Step 1 — Open Device

- Make sure device is unplugged and turned off while working on the device.

- Remove 2 Phillips head, 4.3 mm screws from the bottom side of the tablet with a PH00 screwdriver.

Step 2

- Use the plastic opening tools to pry the back of the tablet open.

- You may need to slide the tool along the sides of the device to get it to open. You might hear some popping noises, it is okay.

- (i) May be helpful if you start by the microSD slot.

Step 3 — Battery

- Use the soldering tool to remove the wires from the motherboard. (Black and Red)

⚠ The soldering tool is hot.

ⓘ Take note of where the wires are located.

Step 4

- Remove the black tape from the battery.

- Remove the three pieces of yellow tape from the battery.

Step 5

- Use the plastic opening tool to pry the battery from the device as it is attached by an adhesive.

- ⚠ Do not proceed if corrosion and/or swelling of the battery is visible.

To reassemble your device, follow these instructions in reverse order.
