Step 1 — CD Drive
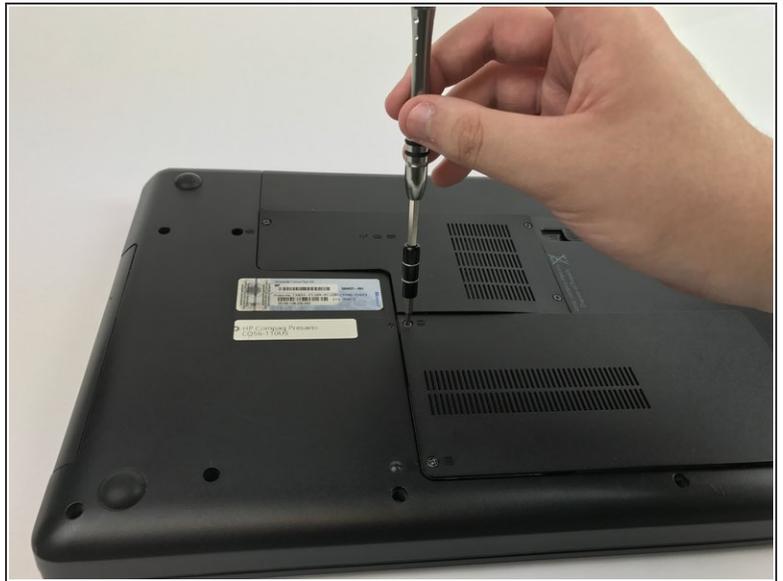

- Loosen the two indicated screws on the panel using a Phillips screwdriver with a PH1 head size.

- (i) The screws do not come free from the panel. They only need to be loosened enough so that the panel can be lifted/pried using a plastic opening tool.

Step 2
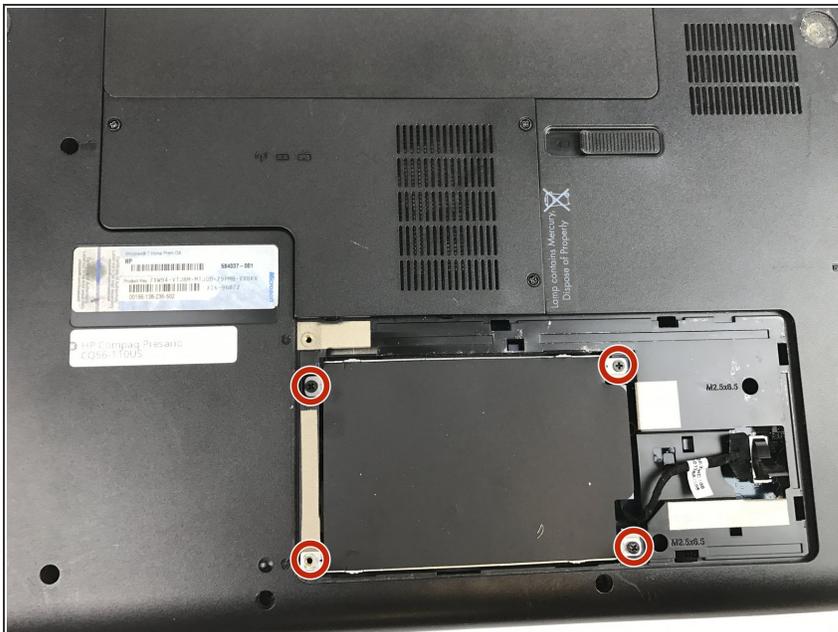

- Use the screwdriver to unscrew the four 5mm screws holding down the hard drive.

Step 3

- Use plastic opening tools to lift up the hard drive. Set aside the hard drive without disconnecting the wire.

Step 4

- Use a Phillips screwdriver with a PH0 head type to unscrew the indicated 5.5mm screw.

Step 5

- Use plastic opening tools to pry open the CD Drive.

Step 6

- Use your hands to pull the CD drive out and remove it from the laptop.

To reassemble your device, follow these instructions in reverse order.
