Samsung Galaxy A5 (2016) Back Cover Replacement

Use this guide to replace the back cover of...

Written By: Tobias Isakeit

INTRODUCTION

Use this guide to replace the back cover of your Galaxy A5.

🔧 **TOOLS:**

iOpener (1)
iFixit Opening Picks (Set of 6) (1)
Plastic Cards (1)

⚙ **PARTS:**

Tesa 61395 Double-Sided Tape (1)

Step 1 — Back Cover

ⓘ Start by switching off your phone.

- Take an iOpener to heat up and soften the glue behind the back cover.

- With a suction handle lift the back cover to insert an opening pick.

Step 2

- Slide the pick up to the middle to separate the back cover from the frame.

- Insert a second opening pick and move around the right corner along the bottom and around the left corner.

Step 3

- Take another opening pick and continue towards the top corner.

- Here you want to use one more pick for the last part at the top.

Step 4

- Insert a [plastic card](#) at the bottom and slide it underneath the back cover.

Step 5

- [Heat up the back cover](#) once again so you can slide the plastic card towards the top.
  ⚠ Always take a peek underneath the back cover to not damage any parts like the NFC antenna.

- Move the plastic card until you reach the camera bump. Now slowly lift up the back cover and finally remove it.

- ⬚ Be sure to remove any residue from the glue and apply new adhesive when reassembling.

To reassemble your device, follow these instructions in reverse order.
