Step 1 — Battery

- Move the switch on the battery door to the Open position.

- (i) The door will automatically swing open after you let it go.
Step 2

- Push the small gray tab on the top right corner to the left. The battery will pop out slightly.

- Keep your finger clear of the battery when it pops out.

Step 3 — Memory Card

- Push the memory card in and let go.
- (i) The memory card will pop out slightly.
- Pull out the memory card.

Step 4 — Back Cover

- Unscrew the small screws on the sides of the camera.
- (i) The screws on the left side(#00P, 4.7mm) are longer than the screw on the right side(#00P, 3.3mm).

Step 5

- Unscrew the three small screws on the bottom(#00P, 3.3mm).

- ⓘ The bottom will fall off.

Step 6

- Lift up the bottom back cover by prying the bottom edge with the spudger.

- Gently lift up the back cover with your hand from the bottom to the top.

Step 7

- Lift the tabs on the ZIF connectors.

- The ribbon cables should easily come out of the ZIF connectors.

Step 8 — Top Cover

- Using the spudger, pry off the top cover by gliding the spudger along the entire edge between the top cover and the front cover.
⚠️ Be careful not to damage the cylindrical capacitor on the circuit board under the top cover.

Step 9 — Flash Assembly

- Unscrew the small screws beneath the top cover(#00P, 1.7mm).

Step 10

- Lift the logic board out with your hand by pushing the tabs out and pulling the logic board up.

- ⓘ The on/off switch and the anti-shake button may fall out.
