## INTRODUCTION

This guide will take you through the necessary steps to replace the speakers in your Asus MeMO Pad 7 ME176C.

---

### TOOLS:

- [iFixit Opening Tool](#) (1)
  - [Metal Spudger](#) (1)
  - [Phillips PH000 Screwdriver](#) (1)
  - [Tweezers](#) (1)
-

## Step 1 — Speakers

- Make sure the device is turned off.
- Carefully insert the [opening tool](#) on the edge of the phone.
- Slowly lift up the panel from the device and repeat the process on the other side.

## Step 2

- To disconnect the ZIF connectors. Place the [metal spudger](#) underneath the ZIF cable and gently pull it outward.

⚠ ZIF connectors are fragile, so work with caution.

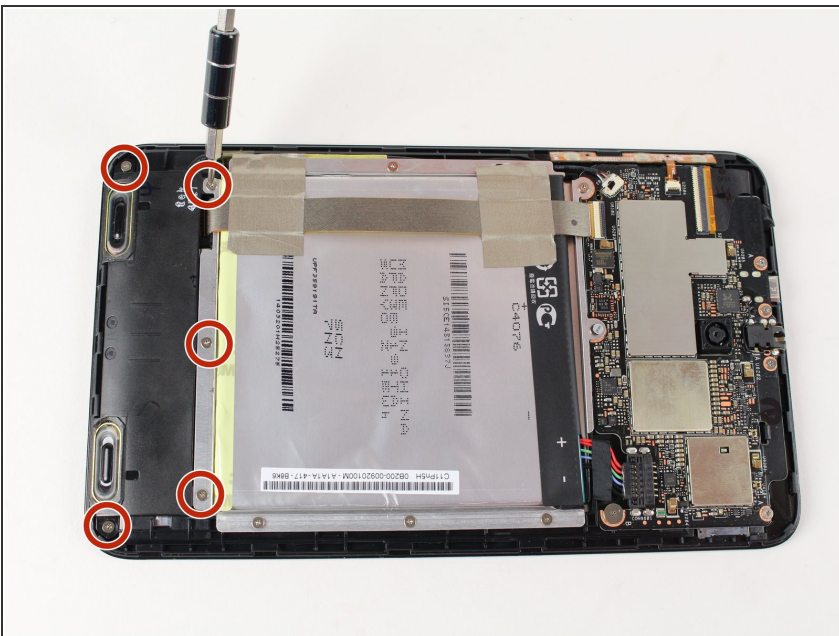

## Step 3

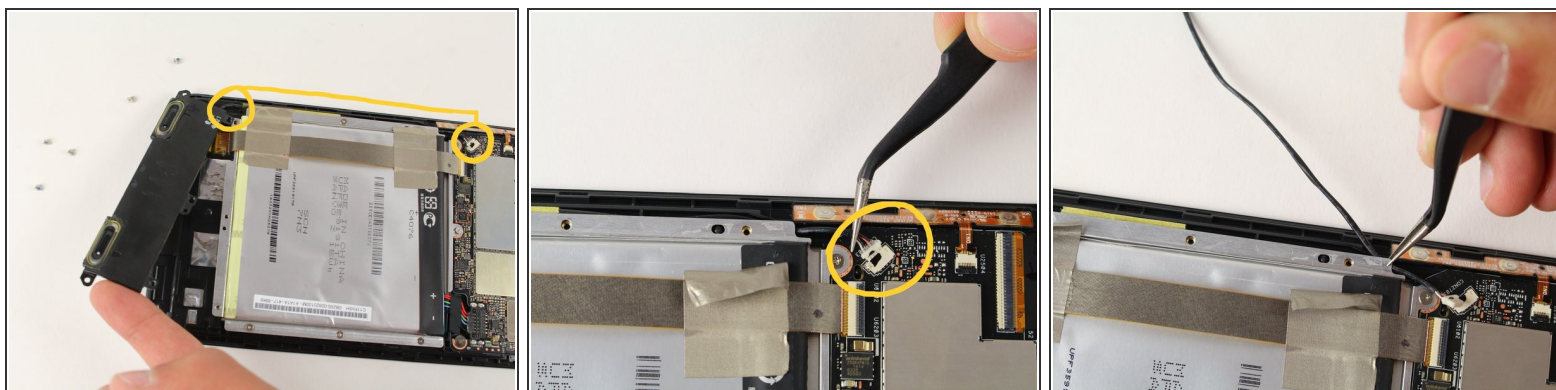

- i The battery connector is located on the right-hand side of the device
  - To disconnect the battery connector. Use [tweezers](#), and carefully lift up the wire.
  - Remove the battery.

## Step 4

- Using a [Philips Head Screwdriver PH000](#), locate the 2.6mm screws and gently unscrew them .
- i Place these screws somewhere you will remember.
- ! Applying too much pressure onto the screen may cause it to break.

## Step 5

- Using [tweezers](#), disconnect the speaker cable connected to the motherboard.

⚠ Be sure not to damage other components on the motherboard.

- After that remove the speaker system completely.

## Step 6

- Now you can attach a new speaker!

To reassemble your device, follow these instructions in reverse order.
