Step 1 — Back Cover

- Heat along the edges of the back cover using a heat gun to soften the glue.

Step 2

- Attach the small suction cup to the back cover near the bottom of the phone.

- Pull up on the suction cup and insert the plastic opening tool in between the back cover and the rest of the phone.
Step 3

- Move the spudger around the edge of the back cover to separate it from the black adhesive.

- (i) Separating the back cover from the rest of the phone ruins the adhesive which makes it no longer waterproof.
Step 4 — Battery

- Carefully disconnect the battery from the logic board by using the plastic spudger as a lever.
Step 5

- Remove the single 1 x 3.0 mm screw holding the battery in using the JIS #00 screwdriver.

Step 6

- Pry the battery up from the ends using the plastic spudger until the battery pops out of the enclosure.

Step 7

● Remove the battery from the device

To reassemble your device, follow these instructions in reverse order.
